What is Time Zone Viewer?

Time Zone Viewer is windows based software that can be used to view the time of the servers or PCs that you have to work remotely. Addition to that, you will be able to log into remote machine with one click, without typing credentials again and again. All the information is in encrypted format to ensure the security of the remote machine credentials.

How to install?

First, visit https://ideajay.com/downloads/#TZViewer, double click the setup file and click next

| 🙀 Time Zone Viewer | | - | - | | × |
